EQUITY DILUTION- EQUITY DILUTION PLAN

Based on a projected company valuation of ₹675 crore, we are looking to raise ₹15 crore in funding. This capital raise would involve an equity dilution in the range of approximately 2% to 2.5%, aligning with our long-term growth strategy.

ROI & EXIT STRATEGY

GROWTH OUTLOOK & RETURN POTENTIAL

Our company is experiencing strong revenue growth, placing us on track for a projected valuation of ₹1350 crore in the next strategic cycle. This creates a lucrative opportunity for earlystage investors.

- A current investment of ₹15 crore at a ₹675 crore valuation (2%-2.5% equity) has the potential to yield an 8x return, translating to an estimated ₹30 crore at the next valuation round.
- Such a high return potential reflects the scalability, market readiness & strategic expansion capabilities of our business.

EXIT STRATEGIES FOR INVESTORS

We offer multiple well-defined exit options to ensure investor flexibility and liquidity:

Initial Public Offer (IPO):

Sell a portion of the company to the public to raise capital for future expansion. This enhances liquidity and provides investors an opportunity to exit with significant gains.

Merger or Acquisition:

Potential to merge or sell the company's operations to a strategic buyer. Existing investors may receive equity in the merged or acquiring entity, securing value continuity.

Venture Capital Rollover:

As the company attracts larger venture capital rounds, early investors may either exit at a premium or roll over their equity into a larger, more secure investment pool. This can bring long-term financial backing, increased valuations, and access to new markets.
